FAZLUR RAHMAN

DATA ANALYSIS STUDENT

+39 351 631 7425 • Fazlurrahaman365@gmail.com • Messina, Italy
linkedin.com/in/fazlur-rahman007 • github.com/Montasir00 • Portfolio: fazlurrahman.vercel.app

KEY SKILLS

DATA & ML

- Python
- Pandas
- NumPy
- scikit-learn
- SHAP
- Matplotlib
- EDA
- Feature Engineering
- Supervised Learning
- Model Evaluation
- Data Cleaning
- Data Visualization

DATABASES & QUERYING

- SQL
- MySQL
- Joins
- Aggregations
- Data Manipulation

SOFTWARE & TOOLS

- Git
- Docker
- Docker Compose

ADDITIONAL PROGRAMMING

- JavaScript
- PHP
- Java

PROFESSIONAL SUMMARY

Final-year BSc Data Analysis student at the University of Messina with hands-on experience in machine learning, statistical modelling, and full-stack development. Completed two internships — including research on air quality prediction using 7 years of meteorological data — and maintain 13+ public projects on GitHub.

EDUCATION & TRAINING

BSc in Data Analysis — Sep 2022 – Jul 2026
University of Messina, Italy
Messina, Italy
Grade: In progress
Relevant courses: Machine Learning, Data Mining, Statistics, Databases
Thesis: Deepfake Audio Detection (in progress)

Higher Secondary Certificate (HSC) — Jun 2018 – Mar 2020
CDA Public School & College, Bangladesh
Chittagong, Bangladesh

WORK EXPERIENCE

Research Intern — Data Science — Jun 2025 – Jul 2025
University of Messina, Italy
Developed O3 air quality prediction models (R^2=0.53, 73% variance explained) by analysing 20,000+ meteorological observations across 7 years.
Engineered automated Python pipelines to acquire and parse large-scale datasets via the Copernicus Climate API.
Conducted statistical correlation analysis on COVID-19 lockdown periods, quantifying the paradoxical drop in primary pollutant levels.

Web Developer Intern — Oct 2025 – Dec 2025
Circular Protocol
Architected a decentralised NFT platform (GeNFT) with IPFS-based asset storage, Ethereum wallet integration, and end-to-end transaction handling via PHP and Web3.php.
Designed and deployed OTP-based multi-factor authentication and minted 15+ NFTs verified on a live testnet environment.
Delivered a fully functional platform covering asset upload, wallet connectivity, and secure user authentication from scratch.

LANGUAGES

- **Bengali :** Native
- **English :** C1
- **Hindi :** C2
- **Italian :** A2
  actively studying towards B1

PROJECTS

Student Dropout Prediction

github.com/Montasir00/Student-Dropout-Prediction

Binary Classification Pipeline

• Python • scikit-learn • Pandas • SHAP

Built a binary classification pipeline using Random Forest and Gradient Boosting on structured educational data, achieving 85%+ cross-validated accuracy.
Applied end-to-end preprocessing and EDA — including missing value imputation and class balancing — to improve model robustness.

• Used SHAP to identify engagement level as the strongest dropout predictor (avg impact: 0.65), producing interpretable outputs suitable for institutional reporting.

Bloom & Basket E-Commerce

github.com/Montasir00/Bloom-And-Basket

Full-Stack Grocery Platform

• PHP • MySQL • Docker • Apache • JavaScript

Developed a full-stack e-commerce platform with a normalised MySQL schema covering products, orders, users, and a 5-stage order lifecycle (pending → delivered).
Containerised the full stack (PHP, MySQL, Apache) using Docker Compose with a 3-service architecture, enabling one-command setup from any environment.
Implemented secure authentication using bcrypt hashing, CSRF protection, and prepared statements.
Applied OWASP best practices to prevent XSS and injection vulnerabilities.

Blockchain Transaction System

github.com/Montasir00/Blockchain-Transaction-System

Multi-Chain Trading Platform

• PHP • Web3.php • Ethereum (Ganache) • Binance API • MySQL

Built a blockchain-based platform supporting live ETH transactions (via Ganache), Bitcoin (via Binance API), and simulated USD — across 3 wallet types in a unified interface.
Implemented real-time wallet balance synchronisation and OTP-based authentication.

• Executed 50+ peer-to-peer testnet transactions with zero failed signatures.
